

To Whom It May Concern,

I, **Thomas Tai Dinh Pham**, hereby assert sole authorship of the enclosed theoretical framework entitled:

Observer Field Theory – A Unified Informational Framework for the Emergence of Reality

The full manuscript, digitally signed and cryptographically timestamped, provides a unified model resolving the contradiction between Quantum Mechanics and General Relativity through observer–informational field interactions.

The signed manuscript was finalized and timestamped via **OpenTimestamps** on **March 23, 2025**. The cryptographic **.ots** file, attached herein, anchors the SHA-256 hash of the manuscript to the Bitcoin blockchain as immutable proof of authorship and content integrity.

All calculations, simulations, theoretical structures, and written content were independently developed by the author. This protected archive contains:

- The digitally signed PDF manuscript
- The OpenTimestamps receipt file (**.ots**)
- A contextual **README.txt** file

Respectfully,

Thomas Tai Dinh Pham
